

NAME

Pod::Simple::Checker -- check the Pod syntax of a document

SYNOPSIS

```
perl -MPod::Simple::Checker -e \  
    "exit Pod::Simple::Checker->filter(shift)->any_errata_seen" \  
    thingy.pod
```

DESCRIPTION

This class is for checking the syntactic validity of Pod. It works by basically acting like a simple-minded version of *Pod::Simple::Text* that formats only the "Pod Errors" section (if Pod::Simple even generates one for the given document).

This is a subclass of *Pod::Simple* and inherits all its methods.

SEE ALSO

Pod::Simple, *Pod::Simple::Text*, *Pod::Checker*
